AIRELOOM LIFT™

We've pioneered a natural chamber between the springs and the mattress-top that allows every element to breathe, the exclusive Aireloom Lift™. Spoil yourself with this added comfort benefit. When the chamber meets the adaptive layers of plush materials, the bed completely synchronizes with your body. It can only be described as a lift, and can only be found in an Aireloom.

HAND-TUFTED

Our tufts are stitched through all comfort layers, not just the top, making them functional by preventing the shifting of materials. This ancient art form allows the mattress to hold its shape better and provides a longer lasting comfort zone. Motion is dissipated and optimum pressure relief is provided by these hand-tufts. Tufting also minimizes the body impressions.
